NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices:

Pacific Life Insurance Company (the Company or Pacific Life) prepares its financial statements based on accounting practices prescribed or permitted by the Nebraska Department of Insurance (NE DOI). The National Association of Insurance Commissioners’ (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the NE DOI. Prescribed statutory accounting practices include state laws and regulations. Additionally, the Director of the NE DOI has the right to permit other specific practices, which deviate from prescribed practices.

During 2024, the Company applied Nebraska Revised Statute 44-2222 for the registered index-linked annuities (RILA) products to align with how the Company manages and measures the overall general account portfolio. The state prescribed practice allows for assets, other than derivatives, to be transferred between the general account and non-insulated Separate Account at book value instead of fair value in accordance with NAIC SAP No. 56, *Separate Accounts*.

The NE DOI approved a permitted accounting practice, effective January 1, 2022, allowing the Company to calculate the policy reserves for funding agreements based on a methodology that differs from the NAIC SAP. Policy reserves for funding agreements are calculated based on Statement of Statutory Accounting Principle (SSAP) No. 52, *Deposit-Type Contracts*, and the reserving methodologies in Appendices A-820 and A-822 which utilizes a reference rate in the valuation interest rate calculation based on an average of a historical twelve-month period ending on June 30 of the calendar year of issue or purchase. In the permitted practice, the Company utilizes a reference rate in the valuation interest rate calculation based on the day of the funding agreement issuance which results in a policy reserve less than or equal to the NAIC SAP policy reserve.

The NAIC's Life Actuarial Task Force has adopted APF 2024-05 for the 2025 Valuation Manual, which allows a monthly determination of the statutory maximum valuation rate for our funding agreements, with domiciliary Commissioner approval. The Company received Commissioner approval to determine statutory maximum valuation rates as described in VM Section II Subsection 3(C) for contracts issued on or after January 1, 2017 (the operative date of the Valuation Manual), effective January 1, 2025. The Company shall continue to determine statutory maximum valuation rates using the same methodology for future valuations. The Company's permitted practice was no longer used subsequent to December 31, 2024.

The following table reconciles the Company’s net income for the three months ended March 31, 2025 and the year ended December 31, 2024 and statutory surplus as of March 31, 2025 and December 31, 2024, between NAIC SAP and practices prescribed and permitted by the NE DOI:

B. No significant change

C. Accounting Policies:

1. No significant change
2. Bonds not backed by other loans are generally stated at amortized cost using the effective interest method. Bonds, including asset-backed securities (ABS), with a NAIC designation of 6 are stated at the lower of amortized cost or fair value with changes in fair value recorded in unassigned surplus as a change in net unrealized capital gains (losses) less tax. Perpetual bonds that do not possess or no longer possess an effective call option shall be reported at fair value regardless of NAIC designation, otherwise reported at amortized cost. Securities that do not meet the definition of a bond are carried at the lower of cost or market and reported as other invested assets.

3-5. No significant change

6. ABS are generally stated at amortized cost using the effective interest method. Income is determined considering anticipated cash flows based on industry prepayment models and internal estimates. These assumptions are consistent with the current interest rate and economic conditions at the time of valuation. For ABS purchased with high credit quality and fixed interest rates, the effective yield is recalculated on a retrospective basis. For all other ABS, including those where cash flows are deemed other than temporarily impaired, effective yield is recalculated on a prospective basis.

7-13. No significant change

D. Going Concern: The Company is not aware of any current situation or event that would cause substantial doubt about its ability to continue as a going concern

NOTES TO FINANCIAL STATEMENTS

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

Effective January 2025, the Company adopted revisions to SSAP No. 21, *Other Admitted Assets*, SSAP No. 26 *Bonds*, SSAP No. 41 *Surplus Notes*, and SSAP No. 43, *Asset-Backed Securities*, as part of the Principles Based Bond Definition Project. (See Note 21.C for detail of changes in measurement for securities reclassified under the bond definition)

In January 2024, the NAIC adopted INT 23-04, *Scottish Re Life Reinsurance Liquidation Questions* (INT 23-04), which addresses accounting and reporting for reinsurance receivables from Scottish Re's estate including impairment analysis and admissibility of reinsurance recoverables. This interpretation is to be applied generically.

D. Asset-backed Securities:

1. Prepayment assumptions for ABS were obtained from industry prepayment models and internal estimates. These assumptions are consistent with the current interest rate and economic conditions at the time of valuation.
2. No other than temporary impairments (OTTIs) were recognized on ABS due to intent to sell or inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis.
3. The following table presents all ABS with an OTTI recognized in 2025, whereby the present value of cash flows expected to be collected is less than the amortized cost basis of the securities

CUSIP	Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	Present Value of Projected Cash Flows	Recognized OTTI	Amortized Cost after OTTI	Fair Value at time of OTTI	Date of Financial Statement When Reported

4. The unrealized losses of ABS where fair value is less than cost or amortized cost for which an OTTI has not been recognized in earnings as of March 31, 2025 are as follows:
- a. The Aggregate Amount of Unrealized Losses:

1. Less than 12 Months

2. 12 Months or Longer

March 31, 2025

\$61,697,592

575,685,124

b. The Aggregate Related Fair Value of Securities with Unrealized Losses:

1. Less than 12 Months

2. 12 Months or Longer

\$3,899,856,459

6,192,153,110

5. Additional Information: OTTI evaluation is a quantitative and qualitative process subject to significant estimates and management judgment. The Company has controls and procedures in place to monitor securities and identify those that are subject to greater analysis for OTTI. The Company has an investment impairment committee that reviews and evaluates investments for potential OTTI at least on a quarterly basis.
- In determining whether a decline in value is other than temporary, the Company considers several factors including, but not limited to, the following: the extent and duration of the decline in value, the reasons for the decline (credit event, currency or interest rate related including spread widening), the Company’s inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis and the performance of the security’s underlying collateral and projected future cash flows. In projecting future cash flows, the Company incorporates inputs from third-party sources and applies reasonable judgment in developing assumptions used to estimate the probability and timing of collecting all contractual cash flows.
- E. Dollar Repurchase Agreements and/or Securities Lending Transactions
1. No significant change

2. For securities lending transactions, the carrying value of securities classified as bonds and on loan at March 31, 2025 was \$2.6 billion. The Company recorded cash collateral received of \$2.6 billion and established a corresponding liability for the same amount, which is included in payable for securities lending on Page 3 - Liabilities, Surplus and Other Funds. The Company may occasionally utilize amounts from the cash collateral for short-term liquidity for general corporate purposes and, as such, does not include these amounts in Schedule DL. As of March 31, 2025, \$0 was utilized for general corporate purposes.

NOTES TO FINANCIAL STATEMENTS

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing:

1. The Company entered into repurchase agreements with unaffiliated financial institutions. Under these agreements, the Company receives sales financing secured by securities as collateral in an amount equal to at least 102% of the estimated fair value of the bonds sold at the inception of the transaction, with a simultaneous agreement to repurchase such bonds at a future date or on demand in an amount equal to the cash initially received plus interest. The Company monitors the ratio of the cash-held to the estimated fair value of the bonds sold throughout the duration of the transaction and additional cash or securities are obtained as necessary. Bonds sold under such transactions may be sold or re-pledged by the transferee. Income and expense associated with repurchase agreements are recorded in the accompanying Statutory Summary of Operations as net investment income. There are no amounts outstanding under these agreements as of March 31, 2025.

G. Reverse Repurchase Agreements Transactions Accounted for as a Secured Borrowing:

1. The Company invests cash collateral received into reverse repurchase agreements as part of its securities lending program. The Company requires that all reverse repurchase agreements must be collateralized by United States (U.S.) Treasury Securities, U.S. Agency Securities, U.S. Corporate bonds and/or U.S. Equities with a minimum margin of 102%. For the securities lending program, reverse repurchase agreements had a maximum maturity of 95 days and are indemnified by the Company's securities lending agent against counterparty default. When counterparty default and price movements of the collateral received present the primary risks for repurchase agreements, the Company mitigates such risks by mandating short maturities, applying proper haircuts and monitoring fair values daily.

The Company entered into a reverse repurchase transaction commitment of \$250 million with an unaffiliated financial institution. Under this agreement, the Company purchases U.S. Treasury Securities and loans cash, with a simultaneous agreement to resell such securities at a future date or on demand in an amount equal to the cash initially loaned plus interest. There were no amounts outstanding under this agreement as of March 31, 2025.

- I. The Company did not have any reverse repurchase agreements transactions accounted for as a sale.
- J. No significant change
- K. Investments in Tax Credit Structures (tax credit investments)
1. The Company participates in various projects to obtain tax credits and other advantages, such as those related to Low Income Housing, Solar Energy, New Market, and Rural Development. The recognition and measurement of investments in projects that generate tax credits and other benefits effect the financial position through an increase in Other Invested Assets and a decrease to Taxes Payable. The results of operations are effected through a decrease to income tax expense and an increase to investment income (when returns from the project exceed basis).
2. As of March 31, 2025, the Company recognized the following tax credits and other tax benefits:

Low Income Housing	\$3,553,627
Solar Energy	(699,326)
New Markets	354,390
Rural Development	312,500
Total	<u>\$3,521,191</u>

3. The Company had a balance of \$202 million of investments in tax credits in the statement of assets as of March 31, 2025.
4. The Company recognized \$2 million and \$0 of investment amortization and non-income tax related activity, respectively, as of March 31, 2025.
5. As of March 31, 2025, the schedule of tax credits to be generated each year are as follow:

10. INFORMATION CONCERNING PARENT, SUBSIDIARIES, AFFILIATES AND OTHER RELATED PARTIES

D. The Company has an agreement with PL&A to lend up to \$100 million at a variable interest rate. There was no amount outstanding as of March 31, 2025. The Company also has an intercompany uncommitted revolving credit facility with affiliates to lend or borrow funds. Under the agreement, the Company can lend or borrow up to 3% of the Company's admitted assets to certain affiliates as of the preceding December 31. The aggregate total borrowing of all outstanding loans is limited to \$1.0 billion including any outstanding loans under other affiliate lending agreements. As of March 31, 2025, \$200 million was borrowed from the Company under the facility at an interest rate of 4.46% which is reported in receivables from parent, subsidiaries and affiliates.

There are no other significant changes to this disclosure.

B. FHLB (Federal Home Loan Bank) Agreements

1. The Company is a member of the FHLB of Topeka. Through its membership, the Company has conducted business activity (borrowings) with the FHLB. It is part of the Company's strategy to utilize these funds as a source of contingency liquidity as well as for spread margin business. The Company has determined the estimated maximum borrowing capacity (after taking into account required collateralization levels) was \$8.1 billion and \$7.8 billion as of March 31, 2025 and December 31, 2024, respectively. However, asset eligibility determination is subject to the FHLB's discretion and to the availability of qualifying assets at the Company. The Company calculated this amount in accordance with FHLB requirements, debt covenant restrictions and insurance laws and regulations.

The Company receives advances under short-term debt arrangements to provide for additional liquidity which were accounted for as borrowed money under SSAP No. 15, *Debt and Holding Company Obligations*. In addition, the Company has issued funding agreements to the FHLB in exchange for cash advances. As such, the Company applies SSAP No. 52, *Deposit-Type Contracts*, accounting treatment to these funds, consistent with its other deposit-type contracts.

20. FAIR VALUE MEASUREMENTS

A. The Company's financial assets and liabilities that are carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, *Fair Value*. The determination of fair value requires the use of observable market data when available. The hierarchy consists of the following three levels that are prioritized based on observable and unobservable inputs.

Level 1: Unadjusted quoted prices for identical instruments in active markets. Level 1 financial instruments include securities that are traded in an active exchange market.

Level 2: Observable inputs other than Level 1 prices, such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in inactive markets, and model-derived valuations for which all significant inputs are observable market data.

Level 3: Valuations derived from valuation techniques in which one or more significant inputs are not market observable.

Investments reported at Net Asset Value (NAV) are not captured within the fair value hierarchy, but are separately identified in the table below.

1. Fair Value Measurements of Financial Assets and Liabilities Carried at Fair Value or NAV as of March 31, 2025:

NOTES TO FINANCIAL STATEMENTS

3. Transfers in and/or out are recognized at the end of each quarter.
4. The fair values of bonds, residual tranches (reported in Other Invested Assets), preferred stocks and common stocks are determined by management after considering external pricing sources and internal valuation techniques. For securities with sufficient trading volume, prices are obtained from third-party pricing services. For securities that are traded infrequently, fair values are determined after evaluating prices obtained from third-party pricing services and independent brokers or are valued internally using various valuation techniques.

The Company's management analyzes and evaluates prices received from independent third parties and determines whether they are reasonable estimates of fair value. Management's analysis may include, but is not limited to, review of third-party pricing methodologies and inputs, analysis of recent trades, comparison to prices received from other third parties and development of internal models utilizing observable market data of comparable securities. The Company assesses the reasonableness of valuations received from independent brokers by considering current market dynamics and current pricing for similar securities.

For prices received from independent pricing services, the Company applies a formal process to challenge any prices received that are not considered representative of fair value. If prices received from independent pricing services are not considered reflective of market activity or representative of fair value, independent non-binding broker quotations are obtained or an internally developed valuation is prepared. Upon evaluation, the Company determines which source represents the best estimate of fair value. Overrides of third-party prices to internally developed valuations of fair value did not produce material differences in the fair values for the majority of the portfolio; accordingly, overrides were not material. In the absence of such market observable activity, management's best estimate is used.

Fair values determined by internally derived valuation tools use market-observable data if available. Generally, this includes using an actively traded comparable security as a benchmark for pricing. These internal valuation methods primarily represent discounted cash flow models that incorporate significant assumptive inputs such as spreads, discount rates, default rates, severity and prepayment speeds. These inputs are analyzed by the Company's portfolio managers and analysts, investment accountants and risk managers. Internally developed estimates may also use unobservable data, which reflect the Company's own assumptions about the inputs market participants would use.

Most securities priced by a major independent third-party service have been classified as Level 2, as management has verified that the significant inputs used in determining their fair values are market observable and appropriate. Externally priced securities for which fair value measurement inputs are not sufficiently transparent, such as securities valued based on broker quotations, have been classified as Level 3. Internally valued securities, including adjusted prices received from independent third parties, where significant management assumptions have been utilized in determining fair value, have been classified as Level 3. Securities categorized as Level 1 consist primarily of investments in mutual funds.

The Company applies controls over the valuation process. Prices are reviewed and approved by the Company's professional credit analysts that have industry expertise and considerable knowledge of the issuers. Management performs validation checks to determine the completeness and reasonableness of the pricing information, which include, but are not limited to, changes from identified pricing sources, significant or unusual price fluctuations above predetermined tolerance levels from the prior period, and back-testing of fair values against prices of actual trades. A group comprised of the Company's investment accountants, portfolio managers and analysts and risk managers meet to discuss any unusual items above the tolerance levels that may have been identified in the pricing review process. These items are investigated, further analysis is performed and resolutions are appropriately documented.

Derivative instruments are reported at fair value using pricing valuation models which utilize market data inputs or independent broker quotations or exchange prices for exchange-traded futures. The Company calculates the fair value of derivatives using market standard valuation methodologies for foreign currency, interest rate swaps, equity options and equity total return swaps. The derivatives are valued using mid-market inputs that are predominantly observable in the market. Inputs include, but are not limited to, interest swap rates, foreign currency forward and spot rates, credit spreads and correlations, interest volatility, equity volatility and equity index levels. The Company accounts for certain derivatives that are designated as cash flow hedges in the same manner as the hedged liability, which are determined using pricing models with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. On a monthly basis, the Company performs an analysis of derivative valuations, which includes both quantitative and qualitative analyses. Examples of procedures performed include, but are not limited to, review of pricing statistics and trends, analysis of the impacts of changes in the market environment and review of changes in the market value for each derivative by both risk managers and investment accountants. Internally calculated fair values are reviewed and compared to external broker fair values for reasonableness.

Derivative instruments classified as Level 1 are exchange-traded. Derivative instruments classified as Level 2 primarily include foreign currency and interest rate swaps. The derivative valuations are determined using pricing models with inputs that are observable in the market or can be derived principally from or corroborated by observable market data, primarily interest swap rates, interest rate volatility and foreign currency forward and spot rates.

Derivative instruments classified as Level 3 include complex derivatives, such as equity options and total return swaps. These derivatives are valued using pricing models which utilize both observable and unobservable inputs, primarily interest rate volatility, equity volatility, equity index levels and, to a lesser extent, broker quotations. A derivative instrument containing Level 2 inputs would be classified as a Level 3 financial instrument in its entirety if it has at least one significant Level 3 input.

The fair value of separate account assets is based on the fair value or NAV of the underlying assets. Separate account assets held at fair value primarily consist of investments in mutual funds and hedge funds.

Level 1 separate account assets include mutual funds that are valued based on reported net asset values provided by fund managers daily and can be redeemed without restriction. Management performs validation checks to determine the reasonableness of the pricing information, which include, but are not limited to, price fluctuations above predetermined thresholds from the prior day and validation against similar funds or indices. Variances are investigated, further analysis is performed and resolutions are appropriately documented.

NOTES TO FINANCIAL STATEMENTS

B. Disclosure of Fair Value of Financial Instruments:

The following methods and assumptions were used to estimate the fair value of these financial instruments as of March 31, 2025:

Mortgage Loans: The fair value of the mortgage loan portfolio is determined by discounting the estimated future cash flows, using current rates that are applicable to similar credit quality, property type and average maturity of the composite portfolio.

Cash, Cash Equivalents and Short-Term Investments (including Securities Lending Reinvested Collateral Assets): For cash and cash equivalents with maturities of three months or less from date of purchase, their fair values approximate their book/adjusted carrying values due to their short maturities. For short-term investments with maturities of one year or less from date of purchase, excluding cash equivalents and money market mutual funds, their fair values are determined using similar valuation techniques as described above for bonds. Cash equivalents that are money market mutual funds have fair values that approximate their book/adjusted carrying values due to the short maturities of the underlying investments of the funds. Securities lending reinvested collateral assets that are primarily reverse purchase agreements have fair values that approximate their book/adjusted carrying values due to their short maturities.

Contract Loans: Contract loans are not separable from their associated insurance contract and bear no credit risk since they do not exceed the contract's cash surrender value, making these assets fully secured by the cash surrender value of the contracts. Therefore, the carrying amount of the contract loans is a reasonable approximation of fair value.

Other Invested Assets: Other invested assets consist primarily of surplus note investments held from other insurance providers and WCFIs that are NAIC rated 1 or 2. The fair values of the surplus note investments are priced by an independent pricing service as described for bonds above. The WCFIs are held at accreted book value which approximates fair value due to the short-term nature of the investment.

Separate Account Assets: The fair value of assets in the Separate Accounts in Level 2 consist of bonds based on the valuation methods described in Note 20 A.4. above. The fair value of assets in the Separate Accounts in Level 3 consist of bonds based on valuation methods described in Note 20 A.4. above and mortgage loans based on the valuation method described above.

Liability for Deposit-Type Contracts: The primary methods used to determine the fair value of liability for deposit-type contracts are: discounted cash flow methodologies using significant unobservable inputs, discounted cash flow methodologies using current market risk-free interest rates and adding a spread to reflect nonperformance risk and the use of observable inputs, such as quoted prices for identical or similar instruments from third party pricing services. The fair value of deposit-type contracts issued at floating rates or that are short-term in nature approximate their carrying value.

Separate Account Liability for Deposit-Type Contracts: The statement value of separate account liability for deposit-type contracts is reported under separate account liabilities and is a reasonable estimate of their fair value because the contractual interest rates are variable and based on current market rates.

Borrowed Money: The fair value of debt issued at floating rates or that is short-term in nature approximates its carrying value.

(1) The tables above exclude the following financial instruments: investment income due and accrued, derivatives collateral receivable and payable and payable for securities lending. The fair value of these financial instruments, which are primarily classified as Level 2, approximates carrying value as they are short-term in nature such that there is minimal risk of material changes in fair value due to changes in interest rates or counterparty credit

(2) Excludes investments accounted for under the equity method

(3) Excludes deposit liabilities with no defined or contractual maturities

NOTES TO FINANCIAL STATEMENTS

- D. The Company had no investments where it was not practicable to estimate fair value.
- E. Investments Measured Using the NAV Practical Expedient:

Separate account assets include hedge funds where the fair value is based on the NAV obtained from the fund managers. Investment strategies related to separate account hedge funds include multi-strategy primarily invested in U.S. and international equity, fixed income, long/short equity, loans, precious metals, real estate, derivatives, privately held companies and private partnerships. The redemption frequency can be daily, monthly, quarterly, semi-annually and annually. The remaining lockup period ranges from zero to 32 months as of March 31, 2025. There are no unfunded commitments of investments measured using the NAV practical expedient as of March 31, 2025.

21. OTHER ITEMS

- A-B. No significant change
